

Submission 49 – Confidential

I live in a rural town surrounded by acreages. My next door neighbour, whose property is approx. 200m away from our boundary, constantly flies a drone over our house, continually capturing photos and videos. It is incredibly invasive and an uncomfortable breach of our privacy, and the sound alone is unfathomably aggravating. We live on acreage so we can enjoy privacy. Instead, we have no control over it due to the lack of regulation surrounding private property and the immediate airspace within. And we are not alone. Everyone within a 500m radius is complaining about the same thing, yet we are all powerless to make it stop.
