

Submission 45 – Confidential

My wife and I live in a suburban area of Logan in Qld where our neighbours appear to enjoy requesting multiple Wing drone deliveries.

While the noise of one drone delivery does disturb our peaceful enjoyment of our backyard, multiple sequential deliveries are very disturbing.

Hopefully when this Wing service is no longer subsidised, there will be less sequential delivery of low value items, however we think there needs to be a requirement that limits the number of deliveries to the same urban address to one per hour, with all urban deliveries restricted to daylight hours.
